- C. A Building resembling a hangar with a "curved roof", size? material?
- D. Landscaped grounds with walks and benches. Open to the public.

- H. The tail sections of 5 planes visible above the fence. 50X1-HUM
 the planes the same size or perhaps slightly 50X1-HUM
larger than the TU-104 with an elevator which was placed high and 50X1-HUM
appeared very small in relation to the tail section."
- I. About 10 planes visible above the board fence. Only partially visible from the crew room on the third floor of the airport building. On the third plane, counting from the west, a man was working on the tail section, apparently on the elevator. This work lasted several hours. The man appeared very small in relation to the elevator. These 10 planes are presumably of the same type as "H".
